|             | Duration :3hrs Max.Marks:80  | 4    |
|-------------|--|------|
| <b>I.B.</b> | (1) Question No. 1 is compulsory.  |      |
|             | (2)Attempt any three questions out of remaining five.  |      |
|             | (3)Figures to the right indicate full marks.   | 5000 |
|             | (4)Assume suitable data if required and mention the same in answer sheet                             | 700  |
| 1.          | Solve any four   | 2(   |
|             | (a) Explain practical diode detector.  |      |
|             | (b) Define sensitivity, image frequency rejection and fidelity for radio receiver.                   |      |
|             | (c) What is quantization? Explain types of quantization.   |      |
|             | (d) Why IF is selected as 455 KHz in AM?   |      |
|             | (e) List the applications of pulse communication.  |      |
| 2.          | (a) Explain concept of AM Wave with related equations and waveforms.                                 | 10   |
|             | (b) Draw the block diagram of phase cancellation SSB generator and explain how carrier and           | 10   |
|             | unwanted sidebands are suppressed?   |      |
| 3.          | (a) Explain the operation of Foster seeley discriminator with the help of circuit diagram and phasor | 10   |
|             | diagram.   |      |
|             | (b) Explain the principle and generation of indirect method of FM generation.                        | 10   |
| 4.          | (a) What are the drawbacks of delta modulation? Explain the method to overcome these drawbacks.      | 10   |
|             | (b) With the help of suitable waveforms explain generation and detection of PPM.                     | 10   |
| 5.          | (a) Explain Super heterodyne radio receiver in detail with block diagram.                            | 10   |
|             | (b) Explain VSB Transmission in detail with its application.   | 10   |
| 6.          | Write short note on(any four)  | 20   |
|             | (a) Compare FM and PM  |      |
|             | (b) FM noise triangle  |      |
| 29          | (c) Noise figure and noise factor  |      |
|             | (d) Frequency division Multiplexing (FDM)  |      |
|             | (e) Pre emphasis and de-emphasis circuits  |      |
